I studied at the Warsaw University of Technology, majoring Architecture (taught in English).

I have a bachelor degree in Electronic Information Processing at the Jagiellonian University. Which was focused on computer graphics and programming, as well as data analysis, processing and linguistics.

Currently, I am pursuing a master degree in Graphic Design at the PJAiT. Curriculum contains classic artistic workshop combined with computer graphics, animation and projects of interactions and environments.

I am organized, punctual, and meticulous in performing given tasks. Thanks to my experience, I am also great at collaboration and troubleshooting problems.

I have a wide range of interests, including sailing, climbing, and skiing, as well as a passion for photography, fantasy, and F1.
